

Recoilless Technologies International Corp. Limited

XXI Century Pioneer of Recoilless Technologies

LAND WARFARE CONFERENCE 2008

Recoilless Technologies International Corp Limited (RTICL) has been given the opportunity to exhibit and will be formally introducing its Recoilless Technology within the Defence arena in the Victorian Government Stand at the Land Warfare Conference, one of Australia's largest annual Defence Exhibitions held at the Brisbane Convention and Exhibition Centre from 28 to 31 October 2008.

The Land Warfare Conference provides an opportunity for academics, commercial organisations, defence research institutions and military to attend and/or offer papers in the field of Land Warfare and related disciplines. The conference and exhibition will be visited by the users, providers, academics, designers and manufacturers of Land Systems and represents a magnificent opportunity to initiate suitable business dealings.

The exhibit will enable RTICL to present its recoilless technology, its adaptability and avenues of scalability to a majority of defence industry contacts as well as expand the awareness of RTICL which could possibly lead to further discussions and contractual arrangements with potential industry partners and/or collaborators as well as Defence Departments of Allied Countries.

For more information on the conference please visit www.dst.defence.gov.au/events/5345/page/5388.
